

In the past 20 years, very few enhancements have been made to patient personal TVs.

## Introducing the 12" LCD **BedMate**<sup>SM</sup> TV, protected by a halo and featuring an FM radio!

The **BedMate**:

- comes complete with a stainless steel halo for protection. When users swing the arm away from them, the halo keeps the TV from being damaged against a wall or other obstruction.
- allows you to add new functionality as it becomes available because of our patented software. Since TV replacement is kept at a minimum, your bottom line will look immensely better.
- is the only hospital-grade personal TV with an FM radio. Many patients prefer to listen to the radio rather than watch television all day.
- keeps patient and staff safe because of the rounded corners, critically important because the patient comes into direct contact with the 12" TV.
- saves nurse and engineering personnel aggravation with our password-protected, advanced function control lock-out. Patients cannot change menu functions.

**See reverse for additional photo of the **BedMate** on the **OutReach**<sup>SM</sup>, HCI's revolutionary designed arm.**

**If your facility needs wall or ceiling-mounted TVs, our 26" and 32" **RoomMate**<sup>SM</sup> LCD units could save you money since they are compatible with 98% of pillow speakers.**

## Specs and features of HCI RedMate<sup>SM</sup> LCD TVs:

12" unit has cabinet dimensions of 13" x 12" x 3"; weight is 10 lbs.

HCI's two-year warranty is twice as long as the industry standard. Physical abuse or thefts are the only exceptions not covered under our "no questions asked" warranty. Installation and service by our nationwide dealer network is completed on your timetable. In the unlikely event a replacement set is needed, HCI can airship a unit the same day.
