

## UL<sup>®</sup> Listed Hospital Grade DVD Player

**ADDRESSING THE NEEDS OF INDIVIDUAL PATIENTS BY GIVING THEM CONTROL OVER WHAT THEY WATCH.**

PDI's new DVD player allows patients to view movies on *their* schedule. The ability to read SD cards enables family members to share pictures

with a patient. And hospital grade, UL approved means the operation is safe and reliable.

- Progressive Scan Technology
- Anti-Jam Technology
- Durable (2 Yr Warranty)
- Channel 3 RF output
- Remote Included
- Interfaces to any TV
- Component Output Y Pb Pr
- HDMI and Composite Video
- SD/MMC/MS Card Reader

“**The ONLY Healthcare Grade DVD Player in the market today designed for a patient room. Why didn't someone else think of this sooner?**”

But the PDI DVD player is not just a pretty face – high end components were sourced to assure the highest quality picture. Compatible with DVD, VCD, DIVX, MPEG4, CD, MP3, and JPEG means there is no format that can't be read. Standard features also include “Bed A/B” remote separation, metal housing for durability, and a USB 2.0 port.

PDI's DVD player is also the only one that can be mounted on a wall in back of the TV, while displaying information to the patient.
